

GEMSBOND COLORANT PASTE TECHNICAL DATA SHEET

The GemsBond Colorant paste is a coloring paste for all the polyester and epoxy mastics and resins.

The product is a soft paste very easy to mix, available in several colors: white, black, brown, beige, ochre, Botticino, yellow, red, green and blue.

The % of use is max 3%.

Add GemsBond Colorant paste to the mastic or resin to reach the right color. It is possible to add different colors to achieve the desired tone. It is important do not exceed the maximum quantity 3% in weight. An excess of color may waste the quality of the mastic or resin.

The products will last at least 12 months in the normal condition between 18-25°C, kept away from source of heat, humidity and sun light.

Please read the safety data sheet before usage and the rules written on the label on the bottles.
